

Project:
Interactive Installation

DE-FORM

Dimensions: 60X50X5cm

Technical: Arduino, 1 servo motor, 1 IR distance sensor

Description

Object in form of framed empty painting is hanged. The canvas is stretchable. Inside the frame is object pushing the canvas outwards. When the viewer comes closer to the object the frequency of pushing the canvas increases. The goal is to bring "life" to an empty picture by creating illusion of breathing.
